IDEAL INTEGRATION

About us

Ideal Integration is one-stop shopping for residential and commercial automation, custom home theatre and security. It is our passion; we get excited about bringing new technologies and solutions to our clients. Our team has the knowledge and technical expertise to bring your vision to life, on time and on budget.

Our team consists of system designers, project managers and technicians who bring passion to everything we do. From simple to complex systems, we strive to exceed our customer's expectations and settle for no less than 100% satisfaction.

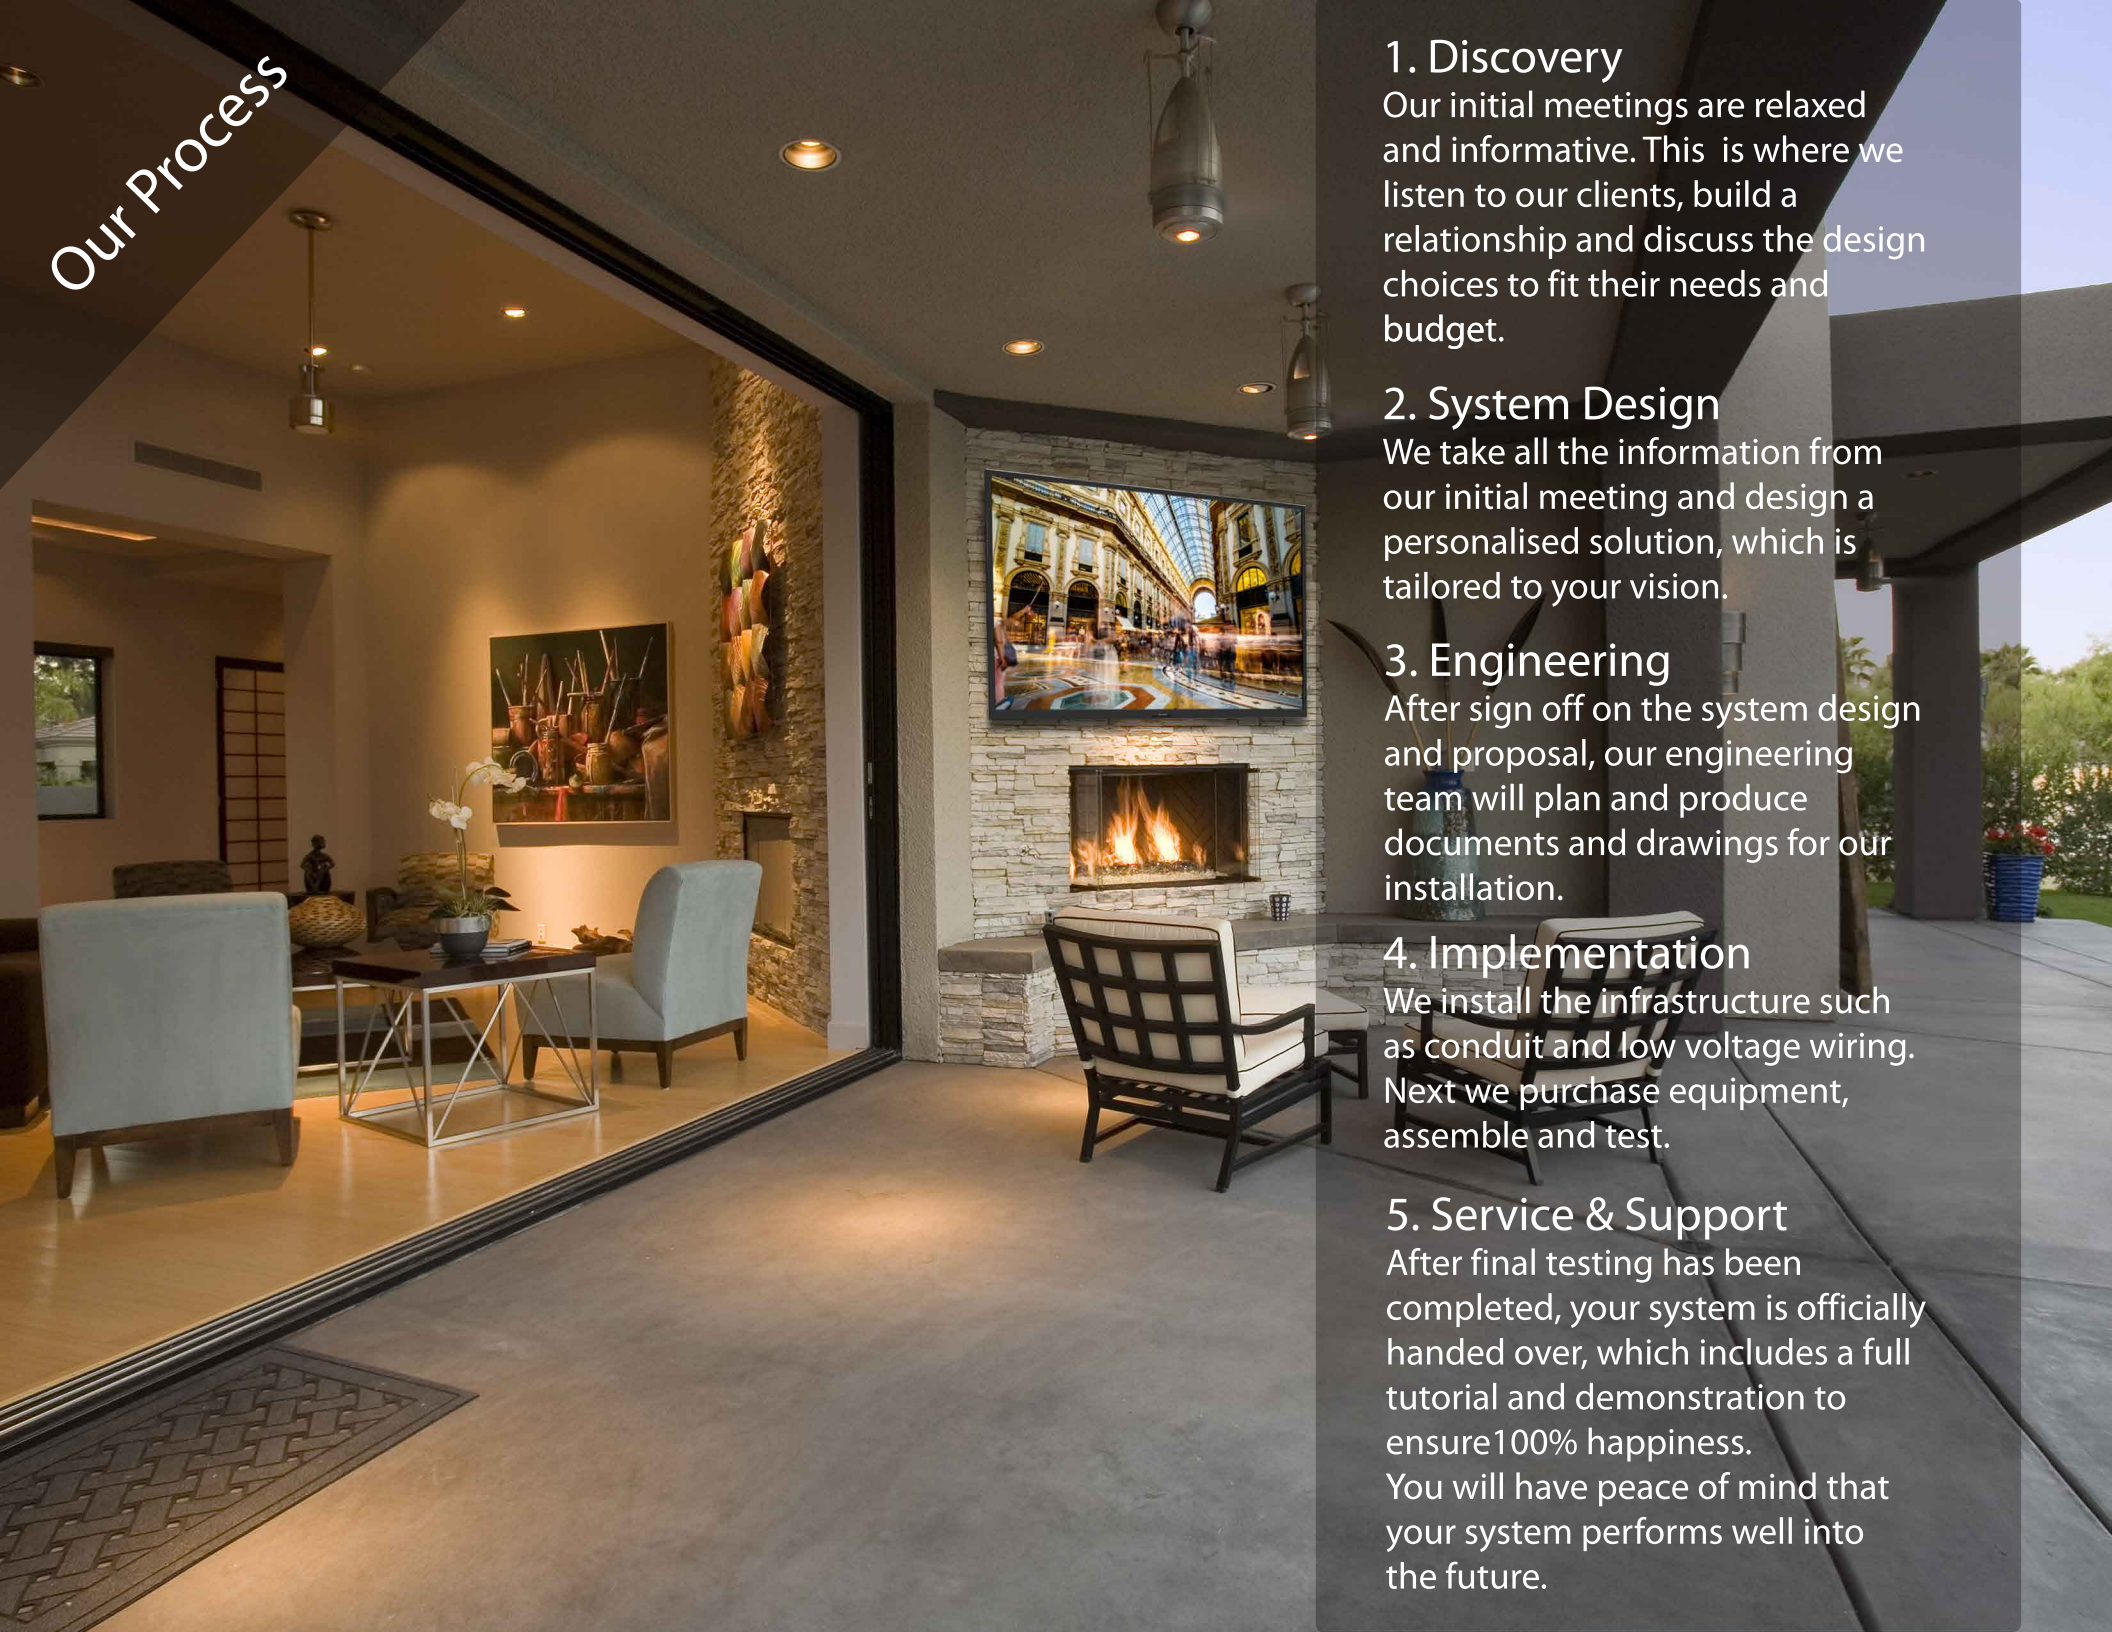

With 25+ years combined experience; we understand that our client's true desires are key to building a system that they have envisioned. We pride ourselves in our creativity, passion, and capabilities to make our customer's vision a reality.

Why choose Ideal Integration?

From mounting a TV, to fully automating your home, we treat all projects, regardless of size, with the same integrity and care. Much of our business is repeat and referral. We work hard to treat every client with respect and professionalism. We treat every home like it is ours.

Our Process

1. Discovery

Our initial meetings are relaxed and informative. This is where we listen to our clients, build a relationship and discuss the design choices to fit their needs and budget.

2. System Design

We take all the information from our initial meeting and design a personalised solution, which is tailored to your vision.

3. Engineering

After sign off on the system design and proposal, our engineering team will plan and produce documents and drawings for our installation.

4. Implementation

We install the infrastructure such as conduit and low voltage wiring. Next we purchase equipment, assemble and test.

5. Service & Support

After final testing has been completed, your system is officially handed over, which includes a full tutorial and demonstration to ensure 100% happiness. You will have peace of mind that your system performs well into the future.

Home Automation

Home automation is about fun and convenient home control.

Being able to control your home with the touch of a button using your smartphone, tablet, or touch screen, from almost everywhere you are, makes life simple and stress free.

Home Network Wi-Fi

A home network is a home's central nervous system. Upgrading to an enterprise network that supports multiple, even hundreds of devices, has never been more important.

We take security seriously. Protecting all of your devices and private information is our highest priority.

A modern bedroom interior featuring a bed with a grey headboard and pillows, a desk with a laptop, and a patterned curtain. The room is lit with recessed ceiling lights and a desk lamp. The overall aesthetic is contemporary and minimalist.

Smart Lighting

Smart lighting provides an easy way to control every light, inside or outside, from a single interface. Integrate one room or the entire house. Smart lighting allows for “scenes” to be customized to your liking. Scenes integrate lighting with other systems in your home to respond with a series of events that happen simultaneously. Perhaps you want a “Goodnight” scene that will turn off all the lights in your home, lock the doors and arm your security system.

Home Security

While home or away, with a smart surveillance and intrusion security system, you can keep an eye on your home. Lock & unlock your doors, get notifications from all door and window sensors, motions, glass breaks, cameras, and video doorbells. We can even program your smart lighting to make it look like you are at home.

Distributed Audio & Video

A distributed multi-room audio & video system allows you to enjoy multiple audio & video streams into any or all rooms in your home, without the clutter.

Home Theatre

Sit Back and Relax!

Entertainment in the comfort of your own home. Immerse yourself in HD picture and immersive sound.

Acoustic Treatment

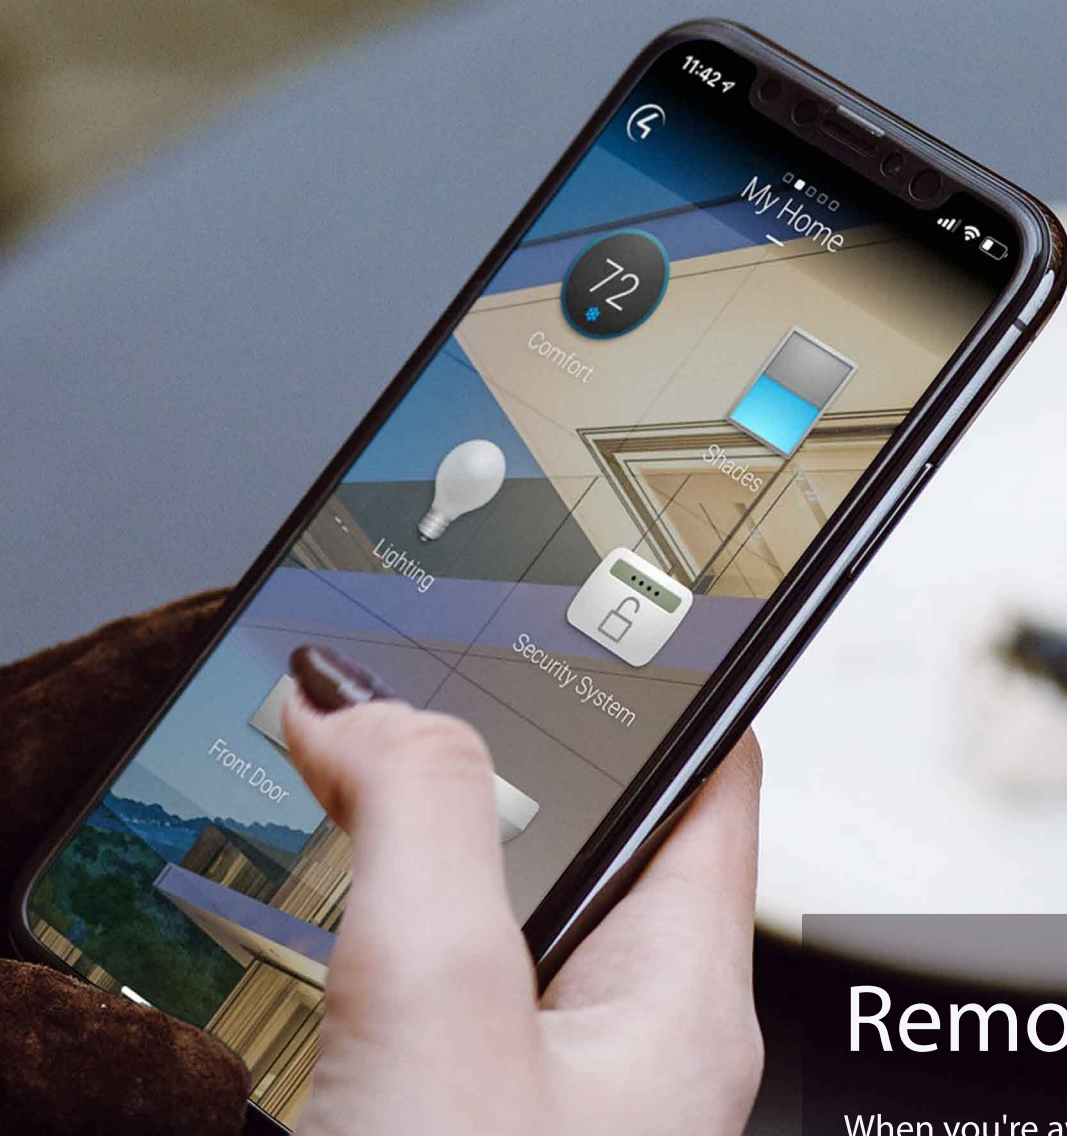

The goal in a Home Theatre acoustic design is to provide the audience a neutral acoustic in order to assure a clear and complete audio experience without distortions.

Seating

Comfortable cinema chairs add to the authenticity of the movie experience, available in a range of fabrics or leather.

Lighting

Stylish lighting together with lighting scenes allows you to set the mood.

Remote Access

When you're away from your home or business, you can have "Anywhere Access" to your Control4 system with the Control4 app and a 4Sight subscription.

Control lights, adjust the temperature, view cameras and more, from virtually anywhere you have 3G/4G or Internet access.

Climate Control

The Control4 Wireless Thermostat was jointly developed with the climate control experts at Aprilaire to deliver a reliable and sophisticated thermostat that consistently delivers the right level of comfort in the most efficient way possible.

Automated Interior Shades

Effortlessly control the natural light coming into your home, save energy, and increase privacy.

Motorized solutions offer clear advantages in nearly any environment. Open or close all of your smart shades with a single button, or let your automation system take control.

Automated Outdoor Shades

Outdoor shades are a perfect solution to enclose an existing structure such as a patio, balcony or gazebo.

With weather resistant fabrics, and designed to keep bugs out, a motorized shade system allows you to open or close your bug screen whenever you like, easily adapting your outdoor living space to the weather and season.

Outdoor Living

Enjoy time outdoors with family and friends. With the ambiance of landscape lighting, outdoor audio and television, with the support of a solid Wi-Fi network, your yard will be the favorite spot for gatherings. Add integrated outdoor shades, irrigation, spa and a fireplace for even more enjoyment.

Equipment Rack Wiring

We take great pride in the wiring we do. From rough-in to wiring our racks, our work is impeccable.

Rack design can be a real art. Paying attention to properly dressing wiring inside the rack gives clear access to equipment for future modifications.
